Performance in every detail

PRODUCT OVERVIEW
Working with the right tools motivates people and ensures a top performance. With Keestrack Equipment you always have the right tools in place.

Keestrack mobile crushing and screening equipment do not only do a good job, they also make your life easier. Simple to operate and to maintain and very cost effective. Available with loads of options to facilitate your job at hand.

Have fun at work, work harder with Keestrack!

</table>
Since 1988 Keestrack designs and produces mobile screening and crushing equipment in-house. The complete production process is privately owned.

Quality, innovation, flexibility and after sales support play a central role and Research and Development ensures Keestrack stays ahead of competition.

Keestrack was the first with direct feed screens and even today, competition cannot match the results. The original patented Keestrack concept is today’s industry standard!

After developing a range of screens and classifiers Keestrack developed the mobile impact crushers.

After the acquisition of OM in 2010, Keestrack added a complete range of jaw crushers to its product range.

Currently Keestrack has a wide range of:
- mobile screens and classifiers
- mobile impact crushers
- mobile jaw crushers
- mobile cone crushers
- mobile stackers
- dust suppression Cannon

Nowadays Keestrack is a global player with a dealer network with knowledgeable and service minded partners.
The goal of Keestrack is to make products as user friendly as possible by using today’s technology.

Keestrack products are easy to operate, maintain, and to access for replacing wear and spare parts.

Design is focused on productivity, safety and ease of use.

Keestrack uses technology to have the lowest possible costs per produced ton.

Energy consumption plays an important role in the costs that is why Keestrack offers both hydraulic electric and hybrid systems.

All equipment is track mobile, compact, easy to transport, operational within minutes without support legs and can be used in multiple applications.
### Crushers

#### Jaw

- **B3**
  - Capacity (mt/h): 300 t/h
  - Feed size: 500 mm - 20”
  - C.S.S. min. - max.: 1000 x 600 mm - 39” x 24”
  - Pre screen: vibrating feeder
  - After screen: grizzly 1450 x 920 mm
  - Standard hopper: 4 m³ / 5.3 yard³
  - Compatibility: Capacity, Feed size, C.S.S., Pre screen, Standard hopper

- **B4**
  - Capacity (mt/h): 400 t/h
  - Feed size: 600 mm / 24”
  - C.S.S. min. - max.: 1100 x 800 mm / 43” x 31”
  - Pre screen: independent 2 deck
  - After screen: 2300 x 1000 mm / 8’ x 3’
  - Standard hopper: 5 m³ / 6.5 yard³
  - Compatibility: Capacity, Feed opening, C.S.S., Pre screen, Standard hopper

- **B5**
  - Capacity (mt/h): 420 t/h
  - Feed size: 650 mm / 26”
  - C.S.S. min. - max.: 1100 x 800 mm / 43” x 31”
  - Pre screen: independent 2 deck
  - After screen: 2300 x 1000 mm / 8’ x 3’
  - Standard hopper: 5 m³ / 6.5 yard³
  - Compatibility: Capacity, Feed opening, C.S.S., Pre screen, Standard hopper

- **B7**
  - Capacity (mt/h): 600 t/h
  - Feed size: 800 mm / 31”
  - C.S.S. min. - max.: 1200 x 800 mm / 47” x 31.5”
  - Pre screen: vibrating feeder with step and scalper
  - After screen: 2200 x 1080 mm / 7’3” x 4’
  - Standard hopper: 6 m³ / 7.8 yard³
  - Compatibility: Capacity, Feed size, C.S.S., Pre screen, Standard hopper

#### Cone

- **H4**
  - Capacity (mt/h): 250 t/h
  - Feed size: 185 mm / 7”
  - C.S.S. min. - max.: 45 - 38 mm / 1 7/10” - 1 1/2”
  - Pre screen: independent 2 deck
  - After screen: 1200 x 1500 / 12’ x 5’ optional
  - Standard hopper: 8 m³ / 10 yard³
  - Compatibility: Capacity, Feed size, C.S.S., Pre screen, Standard hopper

- **H5**
  - Capacity (mt/h): 350 t/h
  - Feed size: 800 mm / 31”
  - C.S.S. min. - max.: 1200 x 1000 mm / 43” x 39”
  - Pre screen: independent 2 deck
  - After screen: 2200 x 1000 mm
  - Standard hopper: 5 m³ / 6.5 yard³
  - Compatibility: Capacity, Feed size, C.S.S., Pre screen, Standard hopper

- **H6**
  - Capacity (mt/h): 400 t/h
  - Feed size: 185 mm / 7”
  - C.S.S. min. - max.: 16 - 60 mm / 6/10” - 2”
  - Pre screen: independent 2 deck
  - After screen: 1200 x 2700 mm / 4’9” x 9’ optional
  - Standard hopper: 8 m³ / 10 yard³
  - Compatibility: Capacity, Feed size, C.S.S., Pre screen, Standard hopper

- **H7**
  - Capacity (mt/h): 500 t/h
  - Feed size: 970 x 1300 mm / 38” x 51”
  - C.S.S. min. - max.: 1267 mm - 1250 mm / 50” - 49”
  - Pre screen: independent 2 deck
  - After screen: 3100 x 1500 mm / 15’ x 5’
  - Standard hopper: 7 m³ / 9 yard³
  - Compatibility: Capacity, Inlet opening HxW, Rotor diameter/width, Pre screen, Standard hopper

#### Impact

- **R3**
  - Capacity (mt/h): 250 t/h
  - Feed size: 770 x 960 mm / 30" x 38 ”
  - C.S.S. min. - max.: 1093 mm - 920 mm / 43" - 3’
  - Pre screen: punch plate 1200 x 920 mm / 43” - 3’
  - After screen: single deck 3100 x 1400 mm / 9’ x 4’
  - Standard hopper: 3.5 m³ / 4.5 yard³
  - Compatibility: Capacity, Inlet opening HxW, Rotor diameter/width, Pre screen, Standard hopper

- **R5**
  - Capacity (mt/h): 350 t/h
  - Feed size: 800 x 1050 mm / 31” x 41”
  - C.S.S. min. - max.: 1260 mm - 1000 mm / 50” - 39”
  - Pre screen: independent 2 deck
  - After screen: 2200 x 1000 mm
  - Standard hopper: 5 m³ / 6.5 yard³
  - Compatibility: Capacity, Inlet opening HxW, Rotor diameter/width, Pre screen, Standard hopper

- **R6**
  - Capacity (mt/h): 500 t/h
  - Feed size: 970 x 1300 mm / 38” x 51”
  - C.S.S. min. - max.: 1267 mm - 1250 mm / 50” - 49”
  - Pre screen: independent 2 deck
  - After screen: double deck 4500 x 1500 mm / 15’ x 5’
  - Standard hopper: 7 m³ / 9 yard³
  - Compatibility: Capacity, Inlet opening HxW, Rotor diameter/width, Pre screen, Standard hopper

**Keestrack**
Keestrack’s product matrix has been set up to give an overview of the mobile solutions Keestrack offers.

The columns show the different products, the higher the number the more throughput capacity of the equipment.

The lines show which machines fit together in a production line.

Another unique feature of Keestrack.

Product Matrix

The columns show the different products, the higher the number the more throughput capacity of the equipment.

The lines show which machines fit together in a production line.

Another unique feature of Keestrack.
**Drive systems**

All Keestrack equipment can be configured to suit your application. Options to make your life easier and to save money, or better, to make money!

**Your choice of Drive**

As fuel and energy costs are getting an increasing effect on operational costs Keestrack offers several drive systems.

*Fuel Saving Load sensing technology*

Keestrack’s basic version is an advanced Diesel engine with low emission norms combined with a load sensing hydraulic system which ensures a minimum impact on the environment.

Load sensing hydraulic save 4 to 6 l of Diesel fuel an hour.

*Electric, energy saving, hybrid & plug-in version*

The Diesel/Electric powered equipment can operate:
- autonomous to the Diesel powered generator (genset),
- by connecting to electrical mains
- by connecting to an external generator

Operating results are of the same high quality as the basic Diesel hydraulic model however maintenance and operating costs are considerable lower.

**After Sales Service**

Servicing your equipment is important and Keestrack and its dealers offer support by delivering wear and spare parts, offering maintenance and repair on site or in our workshops.
Heavy duty apron feeder standard

Hydraulic liftable screen box

Steel hydraulic lines

Protected greasing nipples
- Belt feeder
- Double deck screen box 2.700 x 1.200 mm (9’ x 4’)
- 1 Protection deck
- 1 Screen deck
- 2 Split screening
- 3,24 m² screening surface
- Capacity up to 150 tonnes / hour
- Feed hopper 3,5 m³
- Low emission engine

Applications
- Top soil and many other products
- Pre-screening/scalping
- Separation of “sticky” material
- Screening behind or before a crusher
- Sand, gravel and others

K3

• Unrivaled Performance
• Standard heavy duty plate apron feeder and hydraulic folding hopper walls
• Double deck screen box 2.700 x 1.200 mm (9’ x 4’)
• 3,24 m² screening surface on each deck
• Capacity up to 250 tonnes / hour
• Feed hopper 3,5 m³
• Electric, energy saving, plug-in version available
• Fuel saving load sensing technology
• Standard 2 speed tracks
• Low emission engine
• Lowest fuel consumption in the industry

Applications

• Pre-screening/scalping
• Recycling landfill and construction waste
• Top soil and many other products
• Separation of “sticky” aggregate
• Construction and demolition
• Screening behind or before a crusher
• Sand and gravel
• Quarrying and others

Keeping things simple to operate and maintain by using high technology at the lowest possible costs.

Keestrack makes it possible over and over again, by innovation.

Nothing stays the same, everything changes and so do our products. We simplify, perfect and optimize over and over again by using high quality components and designs.
Choosing Keestrack track mobile crushing equipment does not only allow you to produce at the lowest cost per tonnes but also ensures you to get a good return on investment.

Low fuel cost and smart technology ensure you to save costs. The stacker will reduce the use and cost on the wheel loader and its operator.

Return on investment

The art of mobility

With Keestrack you have the right tools in place.

With the Dolly system for the R6 impact crusher you also have the right transport solution!

Because of the reduced weight, height and length the truck is much easier to drive, does not need any pilot escort and needs less permissions.

So less paperwork, less loading time and more action.

Focus on the job that counts: crushing!
Impact Crushers

Dolly system
Separate driven pre screen
Swiveling return/stockpile conveyor
Patented hydraulic lifted chassis

Kestrack cannot be held liable for incorrect information
• Inlet opening (H x W) 770 x 960 mm (30” x 38”)
• Rotor diameter 1.093 mm (43”), rotor width 920 mm (3’)
• Electric, energy saving, plug-in version available
• Vibrating feeder with punched plate pre screen 1.200 mm x 920 mm (4’ x 3’)
• Capacity up to 250 tonnes / hour
• Optional single deck after screen, 3.100 x 1.400 mm (9’ x 4’), 4,34 m²
• Optional 3rd impact panel as milling beam
• Hopper 3,5 m³
• Highest reduction ratio
• Superior product shape

• Limestone and many other natural rock
• Concrete and landfill recycling
• Primary and secondary crushing
• Yard clean up
• Construction waste
• Demolition
• Quarrying and mining
• Gravel
• Asphalt
• Coal and others

Jaw Crushers

Hydraulic gap adjustment to prevent clogging
Relytec controls with PLC
Hydraulic tensioning
Hydraulic adjustable overband magnet
• Global leader in the 30 tonnes class
• Feed size up to 500 mm (20”)
• Feed opening 1,000 x 600 mm (39” x 24”)
• C.S.S min. - max. 45 - 170 mm (1 8/10” - 6 7/10”)
• Capacity up to 300 tonnes / hour
• Optional Hybrid drive, electric driven conveyors and magnet and plug out available
• Optional independent double deck vibrating pre-screen
• Compact and easy to transport without permit*
• Lowest fuel consumption in the industry
• Best product shape possible
• Intake hopper suitable for wheel loader and excavator, 4 m³
• Hydraulic gap adjustment to safely prevent clogging
• High reliable closed circuit smooth drive of jaw crusher
• Smart sequential auto start/stop from remote
• Ability to track while producing

* local legislation always apply

Applications

- Concrete and landfill recycling
- Construction waste
- Demolition
- Primary crushing
- Dolomite, sandstone, most quarry applications
- Gravel
- Coal
- Slag and others

Keestrack cannot be held liable for incorrect information.
Knowing you have good back up helps you to get the most out of your equipment.

Keestrack Group Equipment is backed up by perfect after sales service. A dealer network with competent people, with enough spare parts on stock and great logistic services.

Also the after sales service department can maintain and fully service your equipment with, or without, a service contract, on site or in our workshops.
Cone Crushers

Keestrack cannot be held liable for incorrect information
With Keestrack mobile crushing and screening equipment you only have advantages.

- track mobile without support legs
- high performance and reliability
- lowest cost per produced tonne
- available in several drive systems including the high efficient sole electric drive line
- optimum flexibility and mobility, easy to transport because of relative low weight
- operational in no time
- best service and back up
Stackers

Applications
- Stockpiling
- Transport
- Loading
- Sorting

Available in electric drive
Compact transport, fits into sea container
User friendly controls
Several inclinations possible
**Sustainability**

Keestrack strives for ecological and economic sustainable equipment. Making sure the equipment produces a perfect end product at the lowest cost per produced ton.

But Keestrack also makes sure the used Diesel engines have the lowest emission possible. Using load sensing hydraulic systems reduces the fuel usage with 25%.

Alternative drive systems like Diesel/Electric drive or a completely external electric connection reduces the impact on the environment to a minimum.

---

**Consultancy and training**

Keestrack offers consulting for your specific application(s). Our highly qualified engineers can calculate the exact throughput of your Keestrack equipment and advice you on your machine park.

To back up your sales team, technicians and operators Keestrack provides sales and product training, technical training on several topics and on different levels, operator training, spare & wear parts training.
• Main conveyor 800 mm (31") wide, 18 meter (59’) long
• Feed capacity up to 250 tonnes an hour
• Stockpile capacity from 1.200 tonnes to 7.500 tonnes
• Discharge height from 6,7 meter (22’) to 7,8 meter (25’)
• Available in Diesel/Hydraulic drive & Diesel/Electric drive

• Main conveyor 1.000 mm (39") wide, 23.000 mm (75’) long
• Feed capacity up to 500 tonnes an hour
• Stockpile capacity from 2.500 tonnes to 15.000 tonnes
• Discharge height from 6 meter (20’) to 9,4 meter (31’)
• Available in Diesel/Hydraulic drive & Diesel/Electric drive

Keestrack cannot be held liable for incorrect information
Continuous analyses of operational and productivity data are an important key to provide full availability and optimized productivity of machine fleets and processing equipment in quarrying and recycling applications.

On Keestrack’s mobile crushing and screening plants the advanced GSM/Satellite-based monitoring tool Keestrack-er guarantees full real-time location information and status reports and offers access to the plants control software for immediate adjustments or larger updates.
Keestrack Dust Suppression Cannon

- Air flow 32,000 m³/hour
- Throw 40 to 45 meter
- Oscillation of 60°
- Adjustable vertical angle -10° to 55°
- Waterflow 60 l/minute - 20 bar
- Integrated filter system
- Stainless steel ring with 30 nozzles with quick coupling
- Low noise fan
- Water cut off valve and pressure switch safety devices as a standard

Air flow 56,000 m³/hour
- Throw 70 to 80 meter
- Oscillation of 60°
- Adjustable vertical angle -10° to 55°
- Waterflow 75 l/minute - 20 bar
- Integrated filter system
- Stainless steel ring with 30 nozzles with quick coupling
- Low noise fan
